

## Eastway Wetland Management Measures

- Do nothing at all....Just leave it alone.
- Do some minor hydro modifications designed to increase water percolation. Small soil berms (less than 18” with stone spillways)
- Invasive Species control. (Glyphosate Injections in Bush Honeysuckle growing around the perimeter)
- Clearing branches fallen after 2003 Ice Storm still present, piling in small piles for wildlife habitat.
- Clearing it completely, Mowing it, filling it, making a soccer practice or softball field.... (just kidding)

### Property Disposition Options:

1. Deed to City.
2. Deed to Homeowners Association
3. Deed to Friends of Wolf Run.
4. Deed to Adjacent landowner (Tom Martin) with provision a conservation easement be held on property. Work with Bluegrass Land and Nature Trust to hold Conservation Easement.
5. Do nothing, allow it to stay in the hands of the developer

### Use of \$10,000.00 funds Options:

1. Place in trust fund managed by Hill N Dale Neighborhood Association, use proceeds (\$500.00/year) for limited annual maintenance
2. Spend it on implementing management plans listed above.

### Principal Contacts:

**Tom Martin**, Adjacent Landowner, Chair of Joint Management Committee for Hill and Dale Neighborhood Association and Friends of Wolf Run.

**Janet Cabaniss**, Hill and Dale Neighborhood Association President

**Ryan Slack**, Eco Tech Consulting, Friends of Wolf Run

**Brooke Slack**, Wildlife Biologist, Friends of Wolf Run Science Advisor

**Jean Watts**, Wetland Ecologist, Friend of Wolf Run Science Advisor

**Jim Rebman**, LFUCG Division of Water and Air Quality

**Ken Cooke**, Friends of Wolf Run

**Russ Turpin**, Advanced Mulching Technologies, Friends of Wolf Run Science Advisor

**Ed Artowicz**, 3rd Rock Consultants, Conducted study **on site**.
